# MACRO-RELIEF™ 8-0-0

**Macro-RELIEF** provides plants available calcium along with nitrogen derived, in part, from protein hydrolyzed to its constituent amino acids.

## Rate:

Apply 3-6 oz. per 1000 sq. ft. every 7-14 days. Initial applications should be made prior too, or at the onset of salt related stress. During prolonged periods of high stress, apply 6 oz. per 1000 sq. ft. every 7-14 days. Apply with enough water to uniformly distribute Macro-RELIEF to turf canopy. For optimum results, water-in Macro-RELIEF with at least 0.125 inch of irrigation.

Store in original container in a cool, dry area. Keep out of the reach of children. Apply as directed.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/turf, and rinse any product that lands on the driveway, sidewalk or street back onto the lawn/turf.

Macro-RELIEF is tank mix compatible with most soluble fertilizers, insecticides, herbicides, fungicides or plant growth regulators. If you are unsure of the compatibility of your specific tank mix, conducting a standard jar test prior to mixing is recommended. It is recommended not to apply Macro-RELIEF with applications of phosphates or highly alkaline compounds.

This product is intended as a supplement to a regular fertilization program and may not, by itself, provide all the nutrients normally required by plants. A lawn will typically utilize 1 to 4 lbs. of nitrogen per 1000 sq. ft. per growing season. When used as directed, this product will supplement your regular fertilizer program by providing 0.02 to 0.04 lbs. of nitrogen per 1000 sq. ft. Consult your local extension office for questions regarding a regular fertilization program.
